

WATERFRONT PARK COMPETITION EBRO RIVER

The concept of "Xalar" refers to a popular expression meaning to enjoy intensely. The title is a reference to a paradigm shift with respect to the River, which traditionally has been a source of fear and problems (floods,drownings...).

The site is located around the existing bridge that connects the villages of Delteber with Sant Jaume d'Enveja. The new project aims to install fun and entertainment near the river , to design a river pool and to create a hub for all of the of the Delta Area

The main features of the project are:

- To construct a large park in both sides of the bridge.This park will be the epicenter of the project an area to establish different activities for the villagers and visitors.
- To build a new pavilion under the bridge , which also creates an acces to both areas of the park.
- The river front will house, a bike trail , a pedestrian path with stands overlooking the river,restaurants and diferent water related activities.
- A large parking lot will be constructed under a newgrown forest.
- The use of sustainable design that offers a contemporany image
- Large green areas inside the park , were the children can play, the water as a leitmotiv in the design of the landscape
