

BOUTIQUE HOTEL

BOUTIQUE HOTEL

BARCELONA . SPAIN

The project of this exclusive boutique hotel was done in an apartment located in the city of Barcelona. The existing apartment of the early twentieth century had a surface of 240 m2. The existing flat had high ceilings and interesting elements of the modernist movement such as a ceramic mural representing the 4 seasons.

The floor was divided into eight rooms retaining in each those elements of design interest; the stained glass of the kitchen, the reliefs with gargoyles of the wooden beams in the room, all of colored hydraulic floors, the original fireplace etc ...

Each room had to have a new modern bathroom that was to be designed using colored ceramic tiles, all of the furniture was purchased at flea markets. The final idea was to create a space that would respect the preexistences incorporating design and interesting elements that will enhance the hotel brand specialized in unique urban hotels.
