

GOLF CLUB HOUSE AND SPA

PROJECT: GOLF CLUB HOUSE & SPA

LOCATION: WARSAW . POLAND

YEAR: 2009

This project, a few miles from Warsaw, was awarded first prize in the international competition organized by the owner. The three areas of the club are arranged around a curved axis: a porch-series of arches, forming a large square with different levels. The clubhouse and convention center and the spa and meditation center can be accessed from the esplanade. In between these buildings there is a green area with a garden and pool overlooking the golf course.

The club house is composed of three levels. The lower level houses the service areas, changing rooms and storage for golf carts. The first floor is home to the reception, administration, living rooms, bar, restaurants and shops. Its distribution guarantees the best views and includes terraces facing holes 9 and 18 and the tee 1. The second floor is reserved for VIP members.

The porch, a continuous axis linking the entrances to the building, turns into a wooden and glass bridge that reaches the spa and meditation center. These areas incorporate feng shui concepts with different areas depending on use. The lower level, facing south, houses the spa area with treatment rooms, arranged in a circular form: sun-life-heat-fire-touch. Café Manipura, located in the center, attached to the land, represents stability, support and home.
